CONNECT THE DOTS

**Growing Smarter Every Day!**

CONNECT THE DOTS

Parent Guide

This workbook will help your child learn to count from 1 to 10. Plus, dot-to-dot activities can improve your child's problem-solving skills and fine motor skills. With a pencil and crayons, and perhaps just a bit of coaching from you, your child will work and learn for many happy hours.

Here are some suggestions for working with your child:

For a productive learning session, work with this book when you and your child are rested and relaxed.

Make your child's learning environment secure and pleasant. Do your best to transmit the message that learning is challenging, enjoyable, and rewarding. Genuine, specific praise will help build your child's confidence.

Support your child's efforts to move beyond what he or she can already accomplish, but not to the point of frustration. Leave your child eager to learn more!
